**Re: WT Docket No.17-200
Ex Parte Letter**

Dear Ms. Dortch:

Atlanta Communications Company ("ACC") is Two-Way Platinum radio dealer that has been in business for over 50 years supporting the Atlanta Metro area. ACC has vast engineering experience and certified technicians that design and install customer radio communication systems that best suit our customer needs. We are dedicated to providing customers with quality service and products for US Federal entities, State and Local Government and a variety of commercial businesses. Our objective is keep communication seamless and cost-effective for our customers, and with the help of pdvWireless, we are able to be successful in our mission. As a Minority Women Owned enterprise, we have been faced with barriers in the marketplace over time, and know how limiting these can be. pdvWireless's initiative to retune a block of 900MHz is no small feat, and will require the support of many; we are one of those supporters. With the ability to provide a more robust offering to their dealers, pdvWireless will not be held back from further enriching the telecom sector with customized solutions.

Since July 2015, pdvWireless has been a key partner in our business. The Atlanta market is vast, and communication challenges exist in many areas. The PDV team has supported us in many endeavors, making it easier to do business and keep our customers happy. With the ability of being able to utilize a private enterprise broadband network, we will indefinitely reap from the growth opportunities it will afford, along with the cost savings.

As our partnership with pdvWireless continues to expand, we look forward to the possibilities their rebanded spectrum network can bring to our business, thereby fostering innovation while laying the groundwork to scale and offer the most effective solutions to our customer base. We urge the Commission to proceed with this process in a timely manner.

Teresa Velasco
